# The Chesterfield FORMULA\_what is it?

The formulas and processes which make Chesterfield a milder and better-tasting cigarette are secret to prevent others from copying them

If every person knew the method and processes of tanning leather, it would be of interest; but what people want to know is: Is it a good shoe? Is it comfortable? Will it wear longer? Is the price right?

So it is with Chesterfield Cigarettes. If smokers, men and women, knew all of the formulas and processes of manufacture, it would be of interest to them, but what smokers really want is the result.

Everything that goes into Chesterfield Cigarettes is as good as money can buy.

Every process has in it all that science knows about cigarette manufacture.

The formulas are secret to prevent others from copying them. The mildness and the better taste you may prove for yourself. May we ask you to try Chesterfields?
